RESEARCH PSYCHOLOGIST/ PSYCHIATRIST

The Laboratory of Behavorial Sciences of the Gerontology Research Center, National Institute on Aging (located in Baltimore, Maryland) is seeking a scientist to develop and implement a program in the experimental analyses of age changes in coping behavior. Candidates should have a Ph.D. in Psychology or an M.D. with a speciality in Psychiatry, or equivalent; plus significant postdoctoral research experience in the experimental study of stress, personality and coping behavior; and, an interest in the longitudinal analysis of psychological change. Appointment to this position with the Federal government may be made at the GS-14 level of the career Civil Service System ($28,725 to $31,578 per annum depending upon training and experience); or through the Commissioned Corps of the U.S. Public Health Service.

Interested applicants should send a CV and copies of two or three recent reprints or preprints by December 2, 1977 to:
